# Interactive Floor Design Application User Manual

## Welcome

Welcome to the Interactive Floor Design Application, where your architectural visions come to life. Transform your design ideas into reality with our intuitive and feature-rich platform.

## Quick Start Guide

- **Opening the Application:** Launch the application to enter a world of design possibilities.

## Core Features

- **Wall Construction:** Craft the foundation of your space by drawing precise walls, and shaping rooms with just a few clicks.
- **Furniture Placement:** Explore our extensive furniture library. Select, drag, and drop pieces into your plan. Customize each item's size and orientation to match your design vision. Furniture pieces can be effortlessly rotated and resized to fit your design needs. With intuitive controls, you can select any furniture item on your canvas and adjust its orientation to match the room layout perfectly. Similarly, resizing is just as simple, allowing you to expand or contract furniture dimensions to ensure every piece fits harmoniously within the space, providing a seamless and customizable design experience.
- **Multi-Floor Management:** Effortlessly navigate multiple floors using the 'Pages' feature. Add new floors, rename existing ones, and switch between them to refine every level of your project.

## Advanced Tools

- **Customization:** Personalize every element, from wall thickness to furniture fabric, ensuring your design is uniquely yours.
- **Collaboration:** Invite teammates or clients to view and contribute, enhancing the design process through collaborative creativity.
